

## ABACUS FOR COMMUNITIES (AfC)

**Abacus for Communities (AfC)** is a Non-profit organization that works with communities at grassroots level, in partnership with national, regional and international governments, organizations and donors, to promote the development of safe, prosperous, resilient and self-developing communities.

Our core belief and commitment is that communities must in the main, find and adopt self-development mechanisms and while working with government and other institutions, must not wait on them.

### HOW DO WE WORK?

We are a team made up of a small core staff, professional consultants, a host of cooperating partners and a large and growing base of volunteers, through projects involving environment, health, education, infrastructure, culture, security, rural development, disaster risk reduction and the promotion of private-sector enterprises.

AfC has a registered team of some (14) senior consultants, collectively providing more than 200 years of regional and international experience in disaster risk management and more recently, research and analysis, environment and climate adaptation, among other development disciplines.

### WHAT IS OUR ADDED VALUE?

- Our in-depth knowledge of the LAC region
- The diversity and experience of our team allows us to bring a more sustainable and more in-depth approach to our work.
- We follow international and national standards for project implementation.
- Our training is customized for national and regional audiences.
